

These tools will help aid the elevator technician during their installation, troubleshooting, and maintenance.

## Pendant Control

The FVE Pendant Control is a temporary means of operating the unit. The pendant control is recommended for installation or maintenance elevator technicians.

Our FVE pendant comes with a 10ft or 50ft cord. Additionally, FVE offers pendant extension lengths of 10ft, 25ft, and 50ft.

### Length

Pendant, Service 10ft  
Pendant, Install 50ft  
10ft Pendant Extension  
25ft Pendant Extension  
50ft Pendant Extension

## Winding Drum WIFI Travel Router

The FVE WIFI Travel Router is a portable device that connects to the elevator Mitsubishi FX5 PLC. It will allow you to access the FVE web page from Mitsubishi FX5 PLC without cellular service to change timers, see fault codes and view Mitsubishi FX5 PLC Inputs and Outputs that were difficult to view otherwise. This router will be utilized more in the future.

## Powerhead Lifting Devices

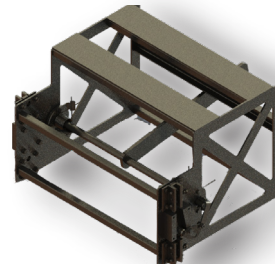

FVE offers Powerhead Lifting Devices for our MRL residential elevators. The rail-specific lifting devices connect to the rail, enabling easy and safe installation of the powerhead, at the top of the hoistway, with the aid of chain fall or winch (not supplied with the lifting device).

An additional hoistway structure must be built into the hoistway for lifting means.

Lift, Powerhead

The T-rail system lifting device is for our 021 series, Excelelevator-MRL, 1000# Winding Drum Elevator.

**Winding Drum Overspeed Braking Device Resetting Tools**

The Winding Drum Overspeed Braking Device Resetting Tools are for resetting the WDOSBD after testing. These resetting tools are for elevator installers and technicians working on 210 series, 500# Custom Lift, and 500# Winding Drum Mods. We offer a fixed length option and an adjustable option that are great for tight spaces in the machine room.
